IV World Congress in Emergency Medicine
November 14 – 17, Riviera Maya, 2012
IV World Congress in Emergency Medicine  
November 14 – 17, Riviera Maya, 2012  

&  
First Meeting  
Schools and Faculties of Medicine  
On the Teaching of Emergency Medicine  
November 14 to 17, Riviera Maya, 2012  

Continuing Medical Education  
World Organization in Emergency Medicine  
Mexican Academy of Emergency Medicine  
Mexican Committee for Cardiac Care and Trauma  
Mexican Board of Emergency Medicine  
European Society of Emergency Medicine  
Escuela Superior de Medicina IPN
Preliminary Program

Emergency Medicine
Research in Emergency Medicine, Reanimation what is new and why? Common emergencies: ACS, Shock, Burns, drawing and near drawing, endocrines Emergencies, urgent and emergency hypertensive, neurology emergencies, Respiratory fail, pain in emergency department, toxicology, Education, Prehospital medical care, nurse program, EM residents, Trauma, Epidemiology of trauma, head trauma, thorax trauma, abdomen trauma, Blood transfusion, trauma center vs general hospital, trauma solutions, Administration and Organization Eemergency Services, Emergency room to ICU, Difficult air way, Stroke, Ventilation in ER, Infection Management in ER, Quality in Emergency, Bio Ethics in emergency medicine, ER how they will become centers of excellence, Aero-Medical evacuations

Disasters, Nursing and Pre-hospital Care
Epidemiology of disasters, Economic Impact of disasters in the world, Hospital disaster planning, Mass gatherings, Experience of 1985 to 2012 Learned Lessons, Biochemical insults, Nursing participations in disasters, Paediatric disaster care, Military programme DN III in México, how this work? The media in mass emergency and disasters, Pre hospital emergency care in disasters, Nurse in the ER and disaster, Recognition of prehospital care in Mexico, Pre-hospital Education vs volunteers, Certificate EMTs in Mexico, International situation in Pre-hospital care, Private transportation, experience in México, What we did and what we did not?

Plenary Sessions, Multidisciplinary, Foro Panel, Round Table, Precongress Workshop and More ...............

Plenary sessions, symposium, forum panel, Panel discussions, Breakfast with experts and more.

Poster Presentation, Deadline to accept papers
October 15, 2012

Registration after July 1, 2012
“Recent Advances In Medical Toxicology That You Should Know About”
A symposium organized by the American College of Medical Toxicology

Background
Poisoning continues to be a leading cause of morbidity and mortality worldwide. Emergency physicians are the first clinicians to evaluate and manage poisoned patients presenting to health care and need to maintain a broad depth of toxicological knowledge in their practice. The management of individuals with acute toxicity, whether related to intentional self-poisoning, recreational use of drugs, or accidental/occupational exposure, is a rapidly evolving field. In this symposium, members of the American College of Medical Toxicology from around the world will highlight some of the recent advances in the field of medical toxicology, and in particular focus on changes in the management strategies for poisonings commonly seen by emergency physicians.

Objectives
After the completion of this session, participants will be able to:

- Discuss the optimal management of patients with acute acetaminophen (paracetamol) poisoning
- Discuss the management options for patients with toxic alcohol poisoning
- Outline the acute and chronic problems related to the use of gamma-hydroxybutyrate and its analogues
- Describe the clinical effects and management of three novel psychoactive substance
- Explain the indications for and concerns with the use of antivenom
- Outline the role of naloxone and octreotide in the management of acutely poisoned patients.
Agenda

- An update in the management of acetaminophen (paracetamol) poisoning
- An update in the management of toxic alcohol poisoning
- What acute and chronic problems are associated with the use of gamma-hydroxybutyrate and its analogues?
- Cocaine: acute coronary syndrome and arrhythmias - mechanisms and management
- Update on antivenoms
- Pitfalls and pearls in the management of the acutely poisoned patient

Faculty

Dr Paul Dargan
Consultant Physician and Clinical Toxicologist, Guy’s and St Thomas’ NHS Foundation Trust and King’s Health Partners, Reader in Clinical Toxicology, King’s College London, London, UK; Joint Chair ACMT International Committee

Dr Knut Erik Hovda
Norwegian Center for NBC Medicine and Department of Acute Medicine, Oslo University Hospital, Oslo, Norway and Member ACMT International Committee.

Dr Ziad Kazzi
Assistant Professor of Emergency Medicine and Director, International Toxicology Postdoctoral Fellowship, Emory University, Atlanta, Georgia, USA; Medical Toxicologist, Georgia Poison Center; Member, ACMT International Committee

Dr Lewis Nelson
Professor of Emergency Medicine, New York University-Bellevue Medical Center
President, American College of Medical Toxicology

Dr Paul Wax
Executive Director, American College of Medical Toxicology
Professor, Department of Surgery, University of Texas-Southwestern

Dr David Wood
Consultant Physician and Clinical Toxicologist, Guy’s and St Thomas’ NHS Foundation Trust and King’s Health Partners, Senior Lecturer, King’s College London, London, UK; Vice-Chair ACMT International Committee
